Professional Summary

Motivated Front-end Developer with a strong interest in creating user-friendly and responsive web applications. Gained practical experience through volunteer work developing a website for an education agency and contributing to team-based web projects. Recognized for problem-solving, adaptability, and collaboration, with a strong eagerness to learn and grow in a professional development environment. Excited to apply technical knowledge while continuing to develop skills and contribute to the success of the team.

Skills

- JavaScript (ES6+), React, Node.js, Express, Python, Java
- HTML5, CSS3, Tailwind CSS, Responsive Web Design
- MySQL, MongoDB, RESTful APIs
- Git, GitHub, Agile/Scrum, Debugging
- Problem-Solving, Team Collaboration, Effective Communication
- Adaptability, Time Management, Customer Service

Relevant Experiences

Frontend Developer (Volunteer)

VCEC – Vancouver, Canada | Feb 2025 – Mar 2025

- Took responsibility for implementing web pages from provided designs using Wix's no-code platform, adapting quickly despite having no prior experience with no-code tools.
- Mastered the platform's structure and workflow within days and successfully delivered fully functional pages in just 3 days, demonstrating efficiency under a tight project deadline.
- Collaborated directly with the client to navigate limitations in JavaScript and platform features, adjusting the site's structure to ensure required functionality was achieved.
- Identified readability and layout issues in the original UI and proposed design enhancements, which were reviewed with both the design team and the client.
- Improved overall user experience by implementing these design adjustments, resulting in a cleaner and more intuitive interface.
- Strengthened adaptability, communication, and problem-solving skills by managing client feedback and iterating quickly under project constraints.

Team Mamber

Korea IT Academy – Seoul, South Korea

① *Jan 2024 – Jan 2024*

- Overcame challenges in understanding file storage flow by researching multipartfile and enctype attributes, improving file submission handling.s
- Learned how to manage file name conflicts by resetting the file name in the service layer.
- Gained a comprehensive understanding of web service architecture and how the server, database, and client interact.

② *Nov 2023 – Dec 2023*

- Gained hands-on experience with the entire web development process, applying various web technologies.
- Developed the project using MyBatis and Spring, understanding the fundamental structure of web development.
- Studied Spring Security while implementing the login feature, learning about user data storage and filter objects.
