Professional Summary

Dedicated Full-Stack Developer with a passion for building comprehensive web solutions that exceed expectations. I treat every project with the same dedication as if it were my own, ensuring high-quality results from client-side interface to server-side architecture. Adept at bridging the gap between design and functionality through active, flexible communication. Highly motivated to leverage both frontend and backend expertise to drive team success and deliver seamless, user-centric experiences.

Skills

- Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
- Backend & Database: Node.js, Express, Spring Boot, MyBatis, MongoDB, MySQL
- Tools & Environment: Git, GitHub, RESTful APIs, Vite, Agile/Scrum, Debugging

Relevant Experiences

Web Developer (Maintenance & Enhancement)

LingoBootCamp – Vancouver, Canada | Jun 2026 – Present

(Re-hired based on exceptional performance and dedication demonstrated during previous volunteer collaboration)

- Optimization & Automation: Re-engineered the inefficient payment architecture by replacing redundant individual pages with a dynamic, CMS-driven structure using Webflow and JavaScript. This automation eliminated manual page creation, drastically increasing development efficiency.
- Payment & Integration Management: Managed critical third-party integrations including Stripe (payment processing), Memberstack (membership/auth), and Rewardful (partnership tracking), ensuring a seamless and secure transaction experience.
- Proactive Maintenance: Took full ownership of the site, proactively identifying and rectifying layout and performance issues to deliver a more intuitive user interface.
- Remote Collaboration: Successfully delivered improvements and maintenance tasks in a 100% remote environment, ensuring clear communication and reliable results under project requirements.

Frontend Developer (Volunteer)

VCEC – Vancouver, Canada | Feb 2025 – Mar 2025

- Took responsibility for implementing web pages from provided designs using Wix's no-code platform, adapting quickly despite having no prior experience with no-code tools.

- Mastered the platform's structure and workflow within days and successfully delivered fully functional pages in just 3 days, demonstrating efficiency under a tight project deadline.
- Collaborated directly with the client to navigate limitations in JavaScript and platform features, adjusting the site's structure to ensure required functionality was achieved.
- Identified readability and layout issues in the original UI and proposed design enhancements, which were reviewed with both the design team and the client.
- Improved overall user experience by implementing these design adjustments, resulting in a cleaner and more intuitive interface.
- Strengthened adaptability, communication, and problem-solving skills by managing client feedback and iterating quickly under project constraints.

Team Member

Korea IT Academy – Seoul, South Korea

① *Jan 2024 – Jan 2024*

- Overcame challenges in understanding file storage flow by researching multipartfile and enctype attributes, improving file submission handling.s
- Learned how to manage file name conflicts by resetting the file name in the service layer.
- Gained a comprehensive understanding of web service architecture and how the server, database, and client interact.

② *Nov 2023 – Dec 2023*

- Gained hands-on experience with the entire web development process, applying various web technologies.
- Developed the project using MyBatis and Spring, understanding the fundamental structure of web development.
- Studied Spring Security while implementing the login feature, learning about user data storage and filter objects.

Education and Training

Diploma in Front End Development

Greystone College – Vancouver, Canada | Jan 2025 – Apr2026

Certification in Data Analysis(R), AI with Python, Front End, Back End

KOREA IT Academy – Seoul, South Korea | Mar 2023 – Feb 2024

Diploma in High School

Seoul, South Korea | Mar 2020 – Feb 2022
